STEP DOWN RING

Used to connect Converter Lenses to Coolpix 880

PROD.#: UPC CODE:
25154 018208251544

FILTER SET

Set of four 28mm filters (UV, Circular Polarizer, Neutral Density 4 and Neutral Density 8) in a handy wallet.

Filter Effects

Name	Color	Exposure Filter	Effects
UV	Transparent	1	Absorbs ultra-violet rays without increase of exposure, thereby preventing haze and foggy effects in distant landscapes. Constant use of this filter is recommended as a lens protector.
Circular Polarizer (CPL)	Gray	2	Removes or reduces reflections from non-metallic surfaces, darkens blue sky while increasing color saturation, penetrates haze. Simply rotate the filter in its mount until the optimum effect is obtained.
Neutral Density 4	Light Gray	4	Neutral Density (ND) filter is used for reducing amount of light without changing color rendition. ND4 transmits 25% of the light. ND16 1/16.
Neutral Density 8	Medium Gray	8
